

# Penetration/surface temperature measuring instrument

## testo 905

---

Easy read-out of measurement values due to rotatable display

---

Broad measuring range

---

High temperature measurement, short-term up to +500 °C

---

Very fast reaction time

---

Easy to operate

---

Large display

---

Auto-off function

---

The testo 905-T1 is a particularly fast penetration thermometer with a broad measuring range of -50 to +350 °C, in the short term even up to +500 °C (1 to 2 minutes). The measuring instrument has a professional industrial sensor (thermocouple Type K). It has an excellent level of accuracy, especially in the upper measuring range. The testo 905-T2 is a surface thermometer with a broad measuring range of -50 to +350 °C, in the short term even

up to +500 °C (1 to 2 minutes). The sprung, broad thermocouple measurement head guarantees a very fast reaction time and high accuracy thanks to the ability to adapt to rough surfaces.

Both instruments have a rotatable display with whose help the measurement values can be read off optimally from different perspectives.

## Technical data / Accessories

### testo 905-T1

testo 905-T1: penetration thermometer, broad measuring range up to 350 °C, high accuracy, incl. attachment clip, battery

Part no. 0560 9055

### testo 905-T2

testo 905-T2: surface thermometer with cross-band probe, extremely fast response time, high accuracy, incl. attachment clip and battery

Part no. 0560 9056
