The testo Saveris 2 WiFi data logger system is the modern solution for monitoring temperature and humidity values in storerooms and work rooms.
Installing the system is child's play, and can be carried out either via a browser, or with the testo Saveris 2 App. The WiFi data loggers reliably record temperature and humidity at adjustable intervals and transmit the measurement values by wireless LAN to the Testo Cloud.
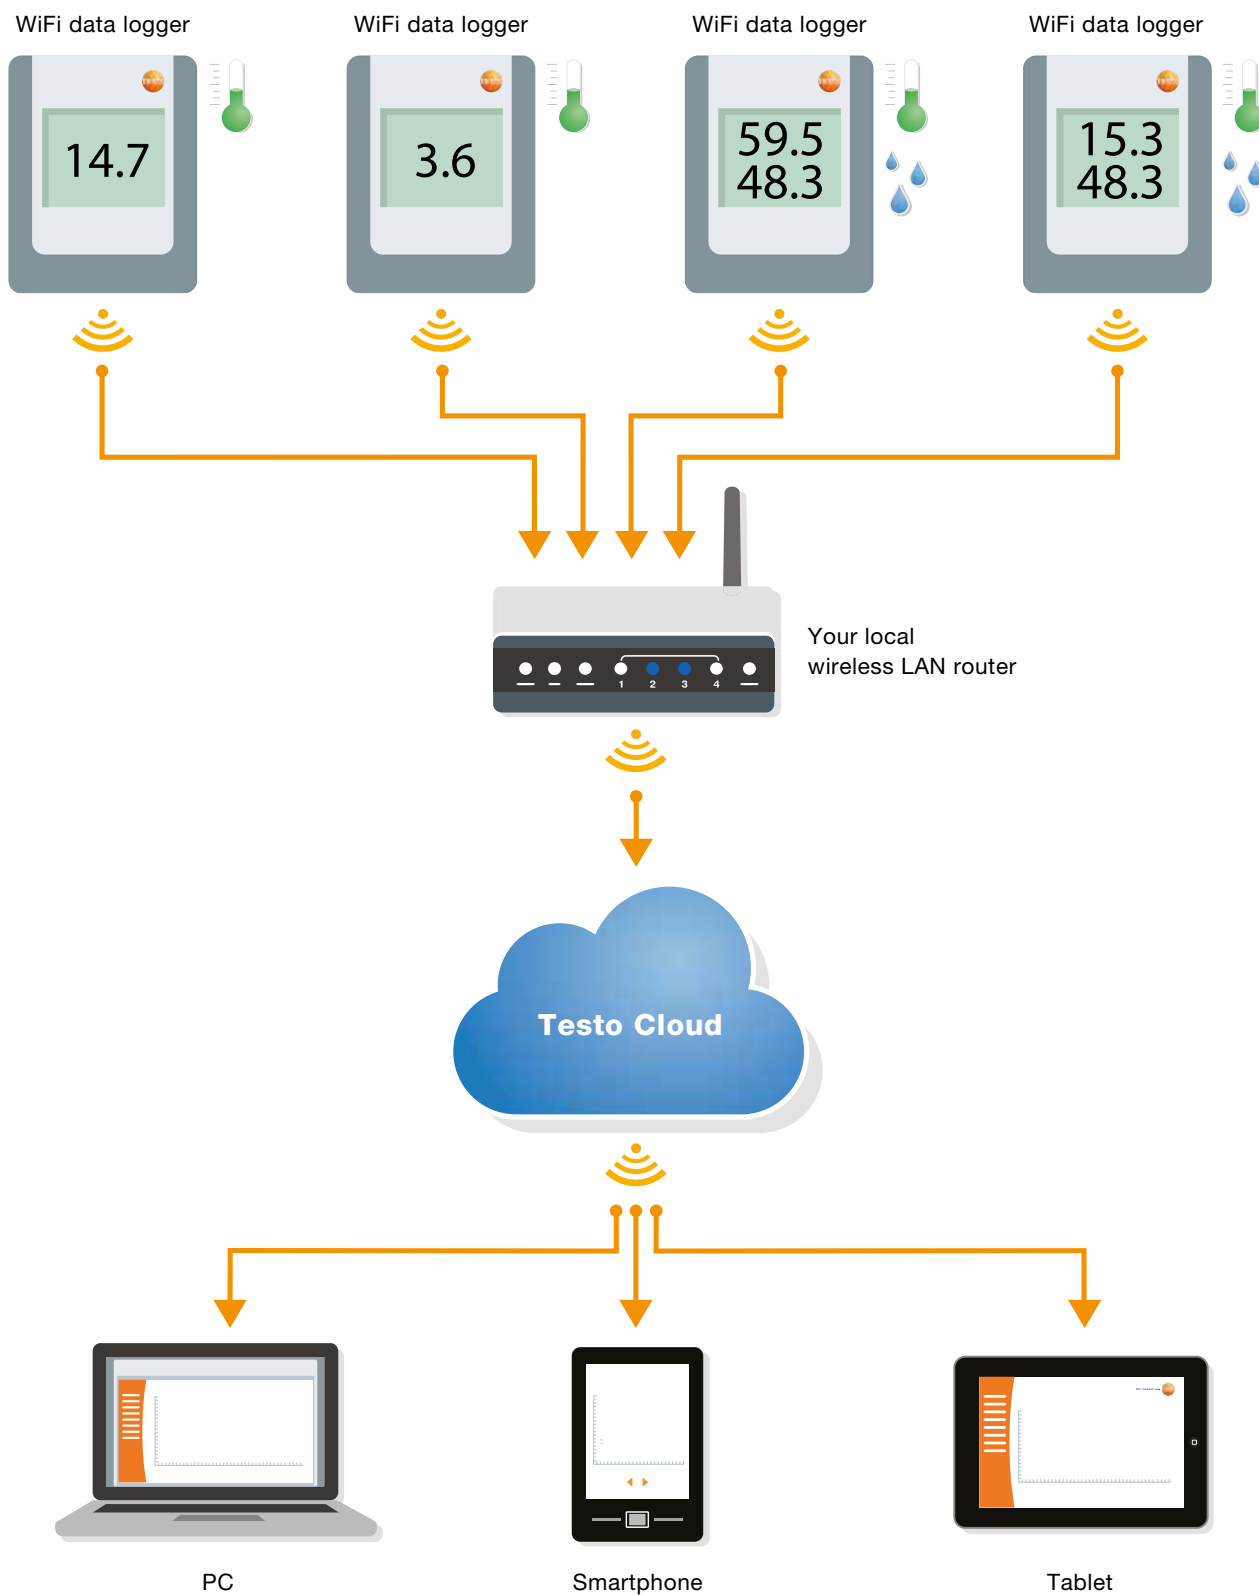

The stored readings can be analyzed at any time, anywhere, using an internet-enabled smartphone, tablet or PC.
Limit value violations are immediately reported by e-mail, optionally by SMS or via the testo Saveris 2 App as a push notification. This allows critical processes to be kept always under control, even if you are not on site.
The long battery life additionally ensures that the testo Saveris 2 system needs to be serviced only rarely.
